I. CLAIM AMENDMENTS

Please amend the claims as indicated in the following listing:

1. (presently amended) A computer implemented method comprising:

using a computer having a display and connected to the Internet,

accepting a user input of a Simplified Chinese word at a graphical user interface on the display;

determining if the user input is an entire desired word, a beginning of the entire desired word, or whether the user input appears anywhere in the desired word;

searching a dictionary for an entry containing the Simplified Chinese word;

using Unicode to determine a Traditional Chinese word equivalent of a Simplified Chinese word;

using Unicode to translate the Simplified Chinese word into an accented Pin Yin word and an English word; and

responsive to a user activation of a single control on the graphical user interface, simultaneously displaying the Simplified Chinese word, the Traditional Chinese word equivalent, the accented Pin Yin word, and the English word.

2. (original) The method of claim 1 wherein the entry exactly matches the Simplified Chinese word.
3. (original) The method of claim 1 wherein the entry begins with the Simplified Chinese word.
4. (original) The method of claim 1 wherein the entry contains the Simplified Chinese word anywhere in the entry.

Serial No. 10/631,070
Attorney Docket No. AUS920030524

5. (original) The method of claim 1 further comprising: accepting the Simplified Chinese word as user input, wherein the Simplified Chinese word is encoded in GB2312 or Unicode.
6. (original) The method of claim 1 further comprising: translating the Simplified Chinese word from GB2312 to Unicode.
7. (presently amended) The method of claim 1 further comprising:

~~displaying the Simplified Chinese word, the Traditional Chinese word, the accented Pin Yin word, and the English word; and~~
wherein the a first font size of the Simplified Chinese word and the ~~font size of the~~ Traditional Chinese word is user configurable to be larger than a second font size of the accented Pin Yin word, and the English word.
8. (presently amended) A computer implemented method comprising:

using a computer having a display and connected to the Internet,
accepting a user input of a Traditional Chinese word at a graphical user interface on the display;
determining if the user input is an entire desired word, a beginning of the entire desired word, or whether the user input appears anywhere in the desired word;
searching a dictionary for an entry containing the Traditional Chinese word;
using Unicode to determine a Simplified Chinese word equivalent of the Traditional Chinese word;
using Unicode to translate the Traditional Chinese word into an accented Pin Yin word and an English word; and

Serial No. 10/631,070
Attorney Docket No. AUS920030524

responsive to a user activation of a single control on the graphical user interface,
simultaneously displaying the Simplified Chinese word, the Traditional Chinese word
equivalent, the accented Pin Yin word, and the English word.

9. (original) The method of claim 8 wherein the entry exactly matches the Traditional Chinese word.
10. (original) The method of claim 8 wherein the entry begins with the Traditional Chinese word.
11. (original) The method of claim 8 wherein the entry contains the Traditional Chinese word anywhere in the entry.
12. (original) The method of claim 8 further comprising: accepting the Traditional Chinese word as user input, wherein the Traditional Chinese word is encoded in Big 5 or Unicode.
13. (original) The method of claim 8 further comprising: translating the Traditional Chinese word from Big 5 to Unicode.
14. (presently amended) The method of claim 8 further comprising:
~~displaying the Simplified Chinese word, the Traditional Chinese word, the accented Pin Yin word, and the English word; and~~
wherein the a first font size of the Simplified Chinese word and the font size of the Traditional Chinese word is user configurable to be larger than a second font size of the accented Pin Yin word and the English word.

15. (presently amended) A method comprising:
using a computer having a display and connected to the Internet,
accepting a user input of a Pin Yin word at a graphical user interface on the display;

Serial No. 10/631,070
Attorney Docket No. AUS920030524

determining if the user input is an entire desired word, a beginning of the entire desired word, or whether the user input appears anywhere in the desired word;

searching a dictionary for an entry containing the Pin Yin word;

using Unicode to translate the Pin Yin word into a Traditional Chinese word, a Simplified Chinese word, and an English word; and

responsive to a user activation of a single control on the graphical user interface, simultaneously displaying the Pin Yin word, the Simplified Chinese word, the Traditional Chinese word, and the English word.

16. (original) The method of claim 15 wherein the entry exactly matches the Pin Yin word.

17. (original) The method of claim 15 wherein the entry begins with the Pin Yin word.

18. (original) The method of claim 15 wherein the entry contains the Pin Yin word anywhere in the entry.

19. (original) The method of claim 15 wherein the Pin Yin word is an unaccented Pin Yin word or a hybrid Pin Yin word.

20. (presently amended) The method of claim 15 wherein ~~the~~ a first font size of the Simplified Chinese word and ~~the font size of the~~ Traditional Chinese word is user configurable to be larger than a second font size of the accented Pin Yin word, and the English word.

21. (presently amended) A computer implemented method comprising:

using a computer having a display and connected to the Internet,

accepting a user input of an English word at a graphical user interface on the display;

determining if the user input is an entire desired word, a beginning of the entire desired word, or whether the user input appears anywhere in the desired word;

Serial No. 10/631,070
Attorney Docket No. AUS920030524

searching a dictionary for an entry containing the English word; and
using Unicode to translate the English word into a Traditional Chinese word, a
Simplified Chinese word, and an accented Pin Yin word;
responsive to a user activation of a single control on the graphical user interface,
simultaneously displaying the English word, the Traditional Chinese word, the Simplified
Chinese word, and the accented Pin Yin word.

22. (original) The method of claim 21 wherein the entry exactly matches the English word.

23. (original) The method of claim 21 wherein the entry begins with the English word.

24. (original) The method of claim 21 wherein the entry contains the English word anywhere in
the entry.

25. (presently amended) The method of claim 21: wherein ~~the~~ a first font size of the Simplified
Chinese word and ~~the font size of the~~ Traditional Chinese word is user configurable to be
larger than a second font size of the accented Pin Yin word, and the English word.

26. (presently amended) A program product operable on a computer having a display and
connected to the Internet, the program product comprising:

a computer-usable medium containing instructions encoded thereon and executable
on a computer connected to a display and to a network, the instructions comprising:

accepting a user input of a Simplified Chinese word at a graphical user
interface on the display;

determining if the user input is an entire desired word, a beginning of the entire
desired word, or whether the user input appears anywhere in the desired word;

instructions for searching a dictionary for an entry containing the Simplified
Chinese word;

Serial No. 10/631,070
Attorney Docket No. AUS920030524

instructions for using Unicode to determine a Traditional Chinese word
equivalent of the Simplified Chinese word;

instructions for using Unicode to translate the Simplified Chinese word into
an accented Pin Yin word and an English word;

instructions for, responsive to a user activation of a single control on the
graphical user interface, simultaneously displaying the English word, the Traditional
Chinese word, the Simplified Chinese word, and the accented Pin Yin word.

27. (original) The program product of claim 26 wherein the entry exactly matches the Traditional Chinese word.

28. (original) The program product of claim 26 wherein the entry begins with the Traditional Chinese word.

29. (original) The program product of claim 26 wherein the entry contains the Traditional Chinese word anywhere in the entry.

30. (original) The program product of claim 26 further comprising: instructions for accepting the Traditional Chinese word as user input, wherein the Traditional Chinese word is encoded in Big 5 or Unicode.

31. (original) The program product of claim 26 further comprising: instructions for translating the Traditional Chinese word from Big 5 to Unicode.

32. (presently amended) The program product of claim 26 wherein ~~the~~ a first font size of the Simplified Chinese word and ~~the font size of the~~ Traditional Chinese word is user configurable to be larger than a second font size of the accented Pin Yin word, and the English word.

Serial No. 10/631,070
Attorney Docket No. AUS920030524

33. (presently amended) A program product operable on a computer, the program product comprising:

a computer-usable medium containing instructions encoded thereon and executable on a computer connected to a display and to a network, the instructions comprising:

accepting a user input of a Traditional Chinese word at a graphical user interface on the display;

determining if the user input is an entire desired word, a beginning of the entire desired word, or whether the user input appears anywhere in the desired word; instructions for searching a dictionary for an entry containing the Traditional Chinese word;

instructions for using Unicode to determine a Simplified Chinese word equivalent of the Traditional Chinese word; and

instructions for using Unicode to translate the Traditional Chinese word into accented Pin Yin word and an English word;

instructions for, responsive to a user activation of a single control on the graphical user interface, simultaneously displaying the English word, the Traditional Chinese word, the Simplified Chinese word, and the accented Pin Yin word.

34. (original) The program product of claim 33 wherein the entry exactly matches the Traditional Chinese word.

35. (original) The program product of claim 33 wherein the entry begins with the Traditional Chinese word.

36. (original) The program product of claim 33 wherein the entry contains the Traditional Chinese word anywhere in the entry.

Serial No. 10/631,070
Attorney Docket No. AUS920030524

37. (original) The program product of claim 33 further comprising: instructions for accepting the Traditional Chinese word as user input, wherein the Traditional Chinese word is encoded in Big 5 or Unicode.

38. (original) The program product of claim 33 further comprising: instructions for translating the Traditional Chinese word from Big 5 to Unicode.

39. (presently amended) The program product of claim 33

wherein the a first font size of the Simplified Chinese word and the font size of the Traditional Chinese word is user configurable to be larger than a second font size of the accented Pin Yin word, and the English word.

40. (presently amended) A program product operable on a computer, the program product comprising:

a computer-usable medium containing instructions encoded thereon and executable on a computer connected to a display and to a network comprising:

accepting a user input of a Pin Yin word at a graphical user interface on the display;
determining if the user input is an entire desired word, a beginning of the entire desired word, or whether the user input appears anywhere in the desired word;

wherein the computer usable medium comprises instructions comprising:

instructions for searching a dictionary for an entry containing the Pin Yin word; and

instructions for using Unicode to translate the Pin Yin word into a Traditional Chinese word, a Simplified Chinese word, and an English word;

Serial No. 10/631,070
Attorney Docket No. AUS920030524

instructions for, responsive to a user activation of a single control on the graphical user interface, simultaneously displaying the English word, the Traditional Chinese word, the Simplified Chinese word, and the Pin Yin word.

41. (original) The program product of claim 40 wherein the entry exactly matches the Pin Yin word.
42. (original) The program product of claim 40 wherein the entry begins with the Pin Yin word.
43. (original) The program product of claim 40 wherein the entry contains the Pin Yin word anywhere in the entry.
44. (original) The program product of claim 40 wherein the Pin Yin word is an unaccented Pin Yin word or a hybrid Pin Yin word.
45. (presently amended) The program product of claim 40 wherein the a first font size of the Simplified Chinese word and the font size of the Traditional Chinese word is user configurable to be larger than a second font size of the accented Pin Yin word, and the English word.
46. (presently amended) A program product operable on a computer, the program product comprising:
- a computer-usable medium containing instructions encoded thereon and executable on a computer connected to a display and to a network comprising:
- instructions for accepting a user input of an English word at a graphical user interface on the display;
- determining if the user input is an entire desired word, a beginning of the entire desired word, or whether the user input appears anywhere in the desired word;

Serial No. 10/631,070
Attorney Docket No. AUS920030524

instructions for searching a dictionary for an entry containing the English word; and

instructions for using Unicode to translate the English word into a Traditional Chinese word, a Simplified Chinese word, and an accented Pin Yin word;

instructions for, responsive to a user activation of a single control on the graphical user interface, simultaneously displaying the English word, the Traditional Chinese word, the Simplified Chinese word, and the Pin Yin word.

47. (original) The program product of claim 46 wherein the entry exactly matches the English word.
48. (original) The program product of claim 46 wherein the entry begins with the English word.
49. (original) The program product of claim 46 wherein the entry contains the English word anywhere in the entry.
50. (presently amended) The program product of claim 46

wherein ~~the~~ a first font size of the Simplified Chinese word and the font size of the Traditional Chinese word is user configurable to be larger than a second font size of the accented Pin Yin word, and the English word.
